**ADVISORY ACTION**

☒ THE PERIOD FOR REPLY:

- a) ☐ will expire \_\_\_\_\_ months from the date of the final Office action (including extensions of time granted).
- b) ☒ expires either (1) three months from the mail date of the final Office action, or (2) on the mail date of this Advisory Action, whichever is later. In no event, however, will the statutory period for reply expire later than six months from the mail date of the final Office action.

Extensions of time may be obtained under 37 CFR 1.136(a). The date on which the petition under 37 CFR 1.136(a) and the appropriate extension fee have been filed is the date for purposes of determining the period of extension and the corresponding amount of the fee. The appropriate extension fee under 37 CFR 1.17(a) is calculated from: (1) the expiration date of the shortened statutory period for reply originally set in the final Office action; or (2) as set forth in (b) above.

- ☐ Appellant's Brief is due in accordance with 37 CFR 1.192(a).
- ☒ Applicant's reply to the final rejection, filed 1/29/02 has been considered with the following effect, but it is not deemed to place the application in condition for allowance.

1. ☐ The proposed amendment to the claim and/or specifications will not be entered and the final rejection stands because:

- e. ☐ They present additional claims without cancelling a corresponding number of finally rejected claims.

Art Unit:

All of applicant's concerns directed toward the specification objection(s) and the first paragraph rejection(s) of 35 U.S.C. 112 are not found persuasive. The Examiner has stated and given reasons in the Final Rejection mailed 11/30/01 why he believes the devices of claims 26 and 31 are not supported in the originally filed application/specification.

All of applicant's concerns directed toward the 102(b) rejection are not found persuasive. Fibers (14) are physically coupled (i.e. in contact with the container) and thermally coupled to the container (10). Also, see column 2, lines 15-33 and column 4, lines 43-51 in Telkes.

All of applicant's concerns directed toward the 103 rejection are not found persuasive. The device of the combination of Telkes and Voorhes et al. discloses the claimed invention along with the motivation to combine the references. See Final Rejection mailed 11/30/01.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christopher Atkinson whose telephone number is (703) 308-2603.
